" Would you like to remove the patch and use the default. navigate to computer:///patch and delete this folder.The use of the Discrepancy between the current and desired performance or "Discrepancy" as defined herein shall be carefully distinguished from the prior art discipline of "Error correction techniques" (e.g. Error correction coding). Error correction coding (ECC) is a discipline for reducing the effect of random or systematic noise on signals which are stored or transmitted over communication links. Numerous types of ECC can be employed, depending upon the nature of the information to be transmitted or stored. ECC techniques are commonly employed to reduce the effect of electromagnetic noise generated by a transmission medium, or to correct errors that are introduced due to the use of communication links, such as fibre optic cables, which are subject to the effect of environmental factors, such as temperature fluctuations. ECC techniques provide a way of ensuring that information being

transmitted or stored is reliably received by an intended receiver or by the system that is storing the information, respectively. Known methods of ECC include parity, block parity, and Reed Solomon codes. Although these and other techniques are currently used, improvements are still being made to increase the effective coding rate and reduce computational overhead. An example of an application where ECC techniques 6d1f23a050
